

Program to interchange two numbers without using third variable.

```
#include<stdio.h>
#include<conio.h>
main()
{
    int a,b;
    scanf("%d%d",&a,&b);
    a=a+b;
    b=a-b;
    a=a-b;
    printf("%d%d",a,b);
    getch();
}
```
