

Program to check whether a person can vote or not.

```
#include<stdio.h>  
#include<conio.h>  
main()  
{  
    int age;  
    scanf("%d",&age);  
    if(age>=18)  
    {  
        printf("person can vote");  
    }  
    else  
    {  
        printf("person can't vote");  
    }  
    getch();  
}
```
