

Program to check whether a person can vote or not.

```
#include<stdio.h>
#include<conio.h>
main()
{
    int age;
    scanf("%d",&age);
    if(age>=18)
    {
        printf("person can vote");
    }
    else
    {
        printf("person can't vote");
    }
    getch();
}
```
