

/* A program in Java to create thread by extending thread class*/

```
class T1 extends Thread
{
    public void run()
    {
        for (int i=0; i<5; i++)
        {
            System.out.println("thread 1 created");
        }
    }
}

class TMain
{
    public static void main(String arg[])
    {
        T1 obj1=new T1();
        obj1.start();
    }
}
```

```
C:\> javac TMain.java
E:\> java TMain
thread 1 created
thread 1 created
thread 1 created
thread 1 created
thread 1 created
```
