

/* A program in Java to demonstrate the use of an array*/

```
class Student
{
    private String name;
    public Student(){}
    public String setName(String name)
    {
        this.name = name;
        return (name);
    }
}

class StudentMain
{
    public static void main (String[] args)
    {
        Student[] obj = new Student[2];
        obj[0] = new Student();
        System.out.println (obj[0].setName ("Tafadzwa"));
        obj[1] = new Student();
        System.out.println (obj[1].setName ("Kombe"));
    }
}
```

```
Command Prompt
E:\>javac StudentMain.java
E:\>java StudentMain
Tafadzwa
Kombe
E:\>
```
